

+Hi...This week I finally brought Buddy home from Pruyns after she was trapped in a snare on November. 26, 2007. The circulation was completely cut off in her front paw, and they waited until 10 days to try to get the circulation going before making the decision to remove the leg. At the last minute, there was blood in the pad and one toe, the other toes had to be amputated. Buddy is an akbash guard dog. I live 2 blocks from the schoolgrounds in Frenchtown. The vet bill is over \$800, but I still have my Buddy...I visited with a gal from Scotland that was going to Edinburgh to testify against trapping. I think we should consider something similar. Within the week following my dogs encounter, my neighbors dog disappeared.....What do you think????

Joyce, member of Footloose Montana

P.S. Shoni at Pruyns can testify to this...
